TARGET MARKET DETERMINATION

This Target Market Determination (TMD) describes the investors that make up the target market for this trust and sets out some other matters relevant to the trust's distribution and review. This document is available to the public free of charge. It doesn't form part of the Product Disclosure Statement (PDS) for the trust and it doesn't list all the trust features or terms. The information in this document doesn't take into account any person's individual investment objectives, financial situation or needs. Investors should read the PDS before making any decision regarding the trust.

Section 1 – Target Market and Product Features

MLC MultiSeries 50 provides clients with exposure to an investment portfolio comprised of a mix of investment managers with Australian and international investment exposure across major asset classes. No borrowing is used for the purpose of gearing

An investor who satisfies the following is in the target market for the Trust:

This Trust is likely to be suitable for an advised or unadvised client seeking capital growth and income. It is likely to be appropriate for those clients who:

- are able to invest their money for the medium to long term
- are seeking a medium return profile
- may need daily access to funds (but who can afford for withdrawals to be delayed / suspended or become subject to a withdrawal offer by us in certain circumstances – for further details about the time it takes to process your request, please consult the PDS)

The Product Features of the Trust are set out in the table below:

Please note, if an investor intends to hold this Trust as part of a diversified portfolio, the Trust should be assessed against the investor's requirements for the relevant portion of the portfolio, rather than the investor's requirements for their portfolio as a whole.

For example, an investor may seek to construct an overall conservative portfolio which includes an allocation to a higher risk investment. In this case, it may be likely that an investment with a higher risk/return profile is consistent with the investor's requirements, even though the risk profile of the investor overall is lower than the investment selected. In making this assessment, please consider all Product Features.

Product Features	Details
